

## Carnebello with Tripe

### Wet Food

### Complete feed for adult dogs

Our Eggersmann Carnebello with Tripe is a high-quality wet food with a particularly appetising consistency, as it contains juicy muscle meat with a firm and meaty texture. Made with high-quality tripe, which naturally contains lactic acid bacteria, it can have a positive effect on your dog's digestive system and support the development of healthy gut bacteria. Combining a high amount of premium-quality, easily digestible poultry with salmon oil and omega-3 fatty acids, it provides your dog with all the nutrients it needs. Because of the particularly gentle cooking process, all the important vitamins, trace elements and minerals are retained in this complete dog feed. As it is completely free from grains, sugar and artificial colours and flavours, our wet dog feed provides your dog with both a tasty and nutritious meal. Our Eggersmann Carnebello with Tripe is suitable as a complete feed for adult dogs but can also be mixed with dry feed if preferred.
