

E-VET+ Joint Expert

E VET

Complementary feed dogs

Many dogs now suffer from painful wear and tear on their joints - called arthrosis. The causes vary. Some dogs were loaded too early or incorrectly, but there may also be an inherited disposition. Pain can severely impair the mobility of our four-legged friends. With targeted nutrient supplementation, the joint metabolism can be reactivated.

Our E-VET+ Joint Expert contains natural components and nutrients that have been proven to support joint metabolism in dogs.

Chondroitin, GAG (glycosaminoglycans) and MSM (methylsulfonylmethane) are naturally occurring active ingredients that are important for stable cartilage and physiological joint metabolism. In addition, the body receives valuable nutrients via mussel concentrate, linseed and devil's claw to be able to better process an inflammatory event. In combination with diatomaceous earth, vitamins and trace elements, the tendon and joint structures can be sustainably strengthened. In this way, the joint stability and general mobility of your dog can be promoted.

Gelenk Expert for dogs is part of our E-VET+ product range, which, in addition to horse feed, now also complements our dog food range.

Recommandation en matière d'alimentation :

Feeding recommendation:

Mix 1 g E-VET+ Joint Expert per 10 kg body weight with the feed daily.

Due to the higher content of trace elements, the daily dose should be doubled at most if there is an increased need.

1 measuring spoon = approx. 1g

Composition - Additifs: 31,0 % carob, 15,0 % Griffes du diable, 10,0 % Concentré de moules, 5,0 % Lin, 5,0 % Chlorure de glucosamine, 5,0 % MSM (méthylsulfonylméthane), 3,0 % Sulfate de chondroïtine, 2,5 % Parsley, 2,0 % Huile de lin

Composants analytiques et teneurs: 19,7 % Protéines brutes, 7,1 % Matières grasses brutes, 5,3 % Fibre brute, 10,9 % Cendres brutes, 5,2 % HCl-insoluble ash, 0,5 % Sodium, 0,4 % Calcium, 2,6 % Acides gras oméga 3

Additifs nutritionnels par kg: 15.000 mg Vitamine E (3a700i) ^{NA}, 10.000 mg Vitamin C (3a300) ^{NA}, 1.000 mg Iron (3b106) Iron(II) chelate of amino acids hydrate ^{NA}, 200 mg Sulfate de cuivre pentahydraté (3b406) Cuivre (II) ^{NA}, 2.000 mg Manganèse (3b504) acide aminé de chélate de manganèse, hydrate ^{NA}, 4.000 mg

Zinc (3b606) Zinc chelate of amino acids hydrate ^{NA}, 20 mg Selen (3b812) Selenised yeast *Saccharomyces cerevisiae* CNCM I-3399, inactivated ^{NA}, 40.000 mg L-lysine HCL, techniquement pure (3c322), 20.000 mg L-Methionin (3c305) ^{NA}, 30.000 mg Terre de diatomées (E 551c) ^{TA}

NA = Additifs nutritionnels et physiologiques

ZA = Additifs zootechniques

TA = Additifs - auxiliaires technologiques

SA = Additifs sensoriels
